Email: sv3374@srmist.edu.in

DEPARTMENT OF COMPUTING TECHNOLOGIES

FACULTY OF ENGINEERING AND TECHNOLOGY

SCHOOL OF COMPUTING

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

KATTANKULATHUR

OCTOBER 2025

## About Me

I am an aspiring technologist passionate about software development and a tech enthusiast with a keen interest in programming and technology. Skilled in Java, C, and Python, I enjoy exploring how software works and creating simple, effective solutions that make an impact.

## Projects

### 1. Bank Management System (Java Mini Project)

**Objective:** To design a simple and secure system for managing basic banking operations using Core Java.

**Description:** A console-based Java application that enables users to create accounts, perform transactions, and view balances efficiently. It applies Object-Oriented Programming principles such as inheritance and encapsulation and supports file handling or MySQL-based data storage.

**Features:**

- Account creation and management
- Deposit and withdrawal operations
- Transaction history display
- File/database-based data storage
- User-friendly console interface

**Technologies Used:** Java, OOP Concepts, MySQL / File Handling, Eclipse IDE

**Learning Outcome:** Enhanced Java programming skills, improved database connectivity knowledge, and stronger application design logic.

### 2. IoT-Based Physical Model (COA Mini Project)

**Objective:** To demonstrate hardware-software interaction using IoT and microcontroller principles based on computer architecture concepts.

**Description:** Developed an IoT-enabled physical model integrating sensors such as temperature, motion, and light with microcontrollers like Arduino or NodeMCU. The system collects real-time data and displays it on an LCD or dashboard, simulating data flow and control processes similar to those in COA systems.

**Features:**

- Real-time data sensing and transmission
- Microcontroller-based processing

- Output display via LED/LCD or online dashboard
- Demonstrates COA fundamentals such as control signals and data transfer

Technologies Used: Arduino / NodeMCU, IoT Sensors, Embedded C / Arduino IDE, Power Circuit

Learning Outcome: Strengthened understanding of COA principles, IoT applications, and embedded system design.

## Salil Vaidya Cybersecurity Analyst Job Simulation

Certificate of Completion  
April 4th, 2025

Over the period of April 2025, Salil Vaidya has completed practical tasks in:

Identity and access management (IAM) fundamentals  
IAM strategy assessment  
Crafting custom IAM solutions  
Platform integration

Tom Brunskill  
CEO, Co-Founder of  
Forge

Enrollment Verification Code: RFjZ28zcbGyqjg | User Verification Code: Ah0epEkajudwng9 | Issued by Forge
